

Submission

Papers should be written in Microsoft Word and submitted in electronic form by e-mail to the managing editor. Use of single line spacing, line numbers, and page numbers is preferred. The review process may be accelerated if authors send the contact details (e-mail) of persons who would be suitable as referees.

It is a fundamental condition that submitted manuscripts have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher (as far as copyright may be transferable) if and when the article is accepted for publication. The use of general descriptive names, trade marks, etc., even if these are not specifically identified, is not to be taken as a sign that such names are exempt from the relevant protective laws and regulations, and may accordingly be used freely by anyone.

Manuscripts

Manuscripts may be submitted as experimental or review articles, as short notes or as book reviews. Notes describe completed studies of limited scope, rather than incomplete or preliminary work, and should be prepared without dividing the text under headings. Invasive Species Distributions Notes should be sent direct to the section editor, Dr Gad Perry (Gad.Perry@ttu.edu). Manuscripts reporting work that appears to contravene accepted principles of conservation or ethical standards may, in addition to normal review, be referred to members of the Editorial Board. For guidelines refer to *Animal Behaviour* 51: 241-246 (1996).

Manuscripts must be written in English. Spelling may be either British or American English, as long as this is consistent throughout the paper. The first page of a manuscript should contain only (1) the title of the paper, the name(s) and address(es) of the author(s); (2) a list of 5-10 key words or short phrases, in alphabetical order and uncapitalised except for genus or proper names; (3) a short title not exceeding 45 letters and spaces; (4) the name, address and e-mail address of the author to whom correspondence and proofs should be sent. Articles should have an abstract not exceeding 3% of the total length. The names of genus and species should be italicised. The International System of Units should be used; other units may be given in parentheses when they first appear in the text. Literature citations should be in chronological order, and where there are more than two authors only the first should be named, followed by "et al.", as follows: Boulenger (1880) or (Boulenger, 1880; Mertens and Wermuth, 1960; Arnold, 1973; Tyler et al., 1990). Footnotes are not permitted in the text. Final acceptance of a paper is conditional on receipt of a correctly formatted manuscript.

Tables and illustrations

Tables should be numbered consecutively with Arabic numbers on separate pages. Footnotes should be indicated by lower-case suffix letters, beginning with an "a" in each table.

Illustrations should be incorporated at the end of the text file, unless they are large when they

should be sent as separate files. Colour reproductions cannot be published unless the author(s) agree to bear the costs. After reduction, lettering and numbering should not be smaller than 2 mm. If dimensions are important a scale line should be included. Captions should be listed on a separate page after the text or any tables.

References

References should be listed in alphabetical order under the first author's name and should refer only to publications cited in the text. World Wide Web sites may be included in the references if they are stable and complement published sources; they are recommended for publications that are otherwise difficult to obtain. Other web sites are treated as equivalent to personal communications or unpublished data, and should be given in the text only, in parentheses. The format for books, articles from journals and non-serial collective publications, reports and associated web sites is shown by the following examples:

- McCullagh, P., Nelder, J.A. (1983): *Generalized Linear Models*. New York, Chapman and Hall.
- Gittins, S.P. (1983): Population dynamics of the common toad (*Bufo bufo*) at a lake in mid-Wales. *J. Anim. Ecol.* 52: 981-988.
- Semlitsch, R.D., Scott, D.E., Pechmann, J.H.K., Gibbons, J.W. (1996): Structure and dynamics of an amphibian community: evidence from a 16-year study of a natural pond. In: *Long-term Studies of Vertebrate Communities*, p. 217-248. Cody, M.L., Smallwood, J.A., Eds, San Diego, Academic Press.
- NRA (1996): *NRA Special Review of Glyphosate*. NRA Special Review Series 96.1. Canberra, Chemical Review Section, National Registration Authority for Agricultural and Veterinary Chemicals. (<http://www.nra.gov.au/chemrev/glyphosate.shtml>).

Proofs

Proofs will be sent to the corresponding author only once. Corrections should be limited to typographical errors. The costs of any other changes, involving time-consuming and expensive work, will be charged to author(s).

PDF files

A PDF file will be supplied with each article for personal use.

Copyright

It is a fundamental condition that submitted manuscripts have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. The use of general descriptive names, trade marks, etc., in this

publication, even if the former are not specifically identified, is not to be taken as a sign that such names are exempt from the relevant protective Instructions to Authors laws and regulations and may accordingly be used freely by anyone.

Consent to publish

Transfer of copyright

By submitting a manuscript, the author agrees that the copyright for the article is transferred to the publisher if and when the article is accepted for publication. For that purpose the author needs to sign the **Consent to Publish** which will be sent with the first proofs of the manuscript.

Open Access

In case the author wishes to publish the article in **Open Access** he/she can choose the **Brill Open** option, which allows for a non-exclusive Open Access publication in exchange for an Article Publishing Fee, and sign a special **Brill Open Consent to Publish**.

More information on Brill's policy on Open Access can be found on <http://brill.nl/openaccess>. The Brill Open Consent to Publish can be downloaded from <http://brill.nl/downloads/BrillOpen-Consent-to-Publish.pdf>.
